Why MDL?	10

Mission

MDL Engineering is a goal orientated, multi-disciplinary organisation which offers cost effective solutions to the public and private sector through our people while maintaining the highest safety and quality standards.

As a dynamic organisation we are focused on sustainable growth and the development of the knowledge and skills of our employees.

We strive to create real opportunities for underprivileged South Africans.

Vision

To be the preferred supplier of professional end-to-end solutions for the delivery of engineering steel projects in Southern Africa.

A firm philosophy

To maintain the highest possible operational standards, in the best interests of our clients.

MDL Engineering

- Sets the standard for safety, quality and value
- Future-driven company with proud traditions
- Highly client focused.

Our Values

We have seven values by which we aim to operate our business:

E
Empower individuals and teams to be responsible and accountable

V
Value our people to use their resourcefulness to bring about continual improvement

M
Mean what we say

A
Act with trust and integrity at all times

B
Be open-minded

C
Create pride within the business

E
Encourage participation and give support where needed

Leadership

Shane Linderboom

Managing Director

Shane has spent the greater part of his career leading major construction projects throughout Africa, for some of the largest and most reputable construction companies in Africa.

Shane is well known in the construction industry for his reliability and commitment to delivering quality projects safely and on time.

Dale Linderboom

Operations Director

Dale has been involved in the construction industry for 11 years, starting his career as a Quality Control inspector. He achieved his level 2 SAIW certification and was appointed as Quality Assurance Manager of a local construction company.

Dale has a Management degree and was appointed to the board as Operations Director.

Marc Linderboom

Commercial Director

Marc has over a decades experience in the field of Logistics for the Mining and Industrial manufacturing sectors.

His international experience has led to his direct involvement in all aspects of construction – be they strategic, commercial or operational. He ensures that every project is of the highest quality and completed with precise measure.

For the last four years, Marc has served as the Commercial Director for a South African based construction company.

Health & Safety

Health and Safety are deeply rooted in the MDL Engineering culture.

Our systems are simple but effective and are focussed around empowerment of our people.

Behaviour Based Safety (BBS) is a fundamental part of our safety on site and this is underpinned by the focus on the importance of Reporting Incidents, Risk Assessments and Toolbox Talks.

Safety Charter

-  The health and safety of our people are always our priority.
-  We are committed to delivering our clients' projects safely.
-  We benchmark ourselves against industry standards to ensure that we are always applying best practice.
-  Our leadership team is accountable for the safety of our people.
-  We equally expect all individuals to be responsible for their own safety and the safety of others.
-  We empower our people through the provision of training.
-  Regular audits and monitoring to ensure compliance.

BEE

MDL engineering is a 100% black owned organisation and has a **Level 2** BEE status.

We are committed to supporting the principals of B-BBEE and take a proactive approach in the development of PDI's (Previously Disadvantaged Individuals).

Quality

Our goal is to deliver our core and support services –

- in full compliance of our own high standards
- with mutually agreed specifications and requirements
- to satisfy the needs of our clients every time.

Services

Piping

Carbon steel, Stainless steel, Alloys
High and Low pressure systems
Fabrication
Installation
Testing

Mechanicals

Installation
Final alignment
Testing and Commissioning

Structural Steel

Detailing
Fabrication
Erection

Support

Project Management
Materials Management
Procurement
Project Logistics

Markets

Paper and Pulp

Water

Petrochemical Terminals

Sugar

Mining

Renewable Energy
